

Lit up the Dull Corner of the Room with Motion Sensor LED Light Strip

Do you want to give your modern look with the latest technology? Why don't you try out the [Motion Sensor LED Light Strip](#)? It does not require the efforts from your side to turn ON. This amazing light can detect your presence. It automatically turns on when you move, and after waiting for 30 seconds, it turns off. This strip light not only enhances the visual aesthetic but also cuts short the monthly billing.

Add safety as well as convenience to any dim corner of the house with this light. It contains a series of 48 bulbs offering the element of warm white light. You can light up the area of your home and office with the addition of this aesthetic and light.

This stunning light fits anywhere regardless of the status of the room. A 3M sticker adhesive strip permits you to stick to the magnetic base for installation. Afterward, attach or adhere the light to the magnetic base. It may seem difficult to install, but convenient installation is its major quality.

The addition of an automatic sensor saves the power, energy, and time of operating the light. Because your role is just to set and plug in the switch, automatic sensors will handle its operation. It will detect your motion up to 120 degrees from 10 feet away. Moreover, it automatically shuts off after waiting for 30 seconds.

This stunning light does not require battery replacement. Just plug in the USB cord for roughly three hours, and it is ready to use. Get this ultra-thin and high-performing light to light up the room with every movement.
